### Information and invitation

Associations „Zdravo da ste“ and „Centar za životnu sredinu“, from Banja Luka, are informing you and inviting you to attend the presentation of the European network „ORA“ (Observe-Rethink-Act), which will, on 17th of July 2014, in **Zdravo da ste Youth centre**, present itself and its future activities.

In 2009, several European organisations has initiated dynamic educational process called ORA (Observe Rethink Act). This process gathered youth centres, natures parks, NGOs working in the field of environment protection, associations for social promotion, collectives, art groups, organisations for promotion of culture and eco-centres, to expand the field of possibilities for social, cultural, ecological and economical participation of young people in community.

Concept of ORA process is providing young people with opportunities to observe their context (at local and international level), to think about their role in it (individually and as a part of society) and to act as responsible citizens, and by doing that to strengthen their community.

Participation in this process has improved and increased efficiency and quality of activities at the local level with all involved partners. Trough combination of different methods of non-formal education and several elements in relation to sustainable development, ORA process has produced positive results on local levels and encouraged better engagement of young people from all partner organisations.

With the objective to strengthen the links between partners and make them sustainable for a long-term period, we have decided to establish the common platform and establish and international network which will gather organisations from different European countries. This network will continue to work together in the future, to plan joint initiatives, coordinate activities and design future projects within ORA process.

Vision of ORA is to create inclusive and participative society without discrimination, where people achieve their full potentials in harmony with their environment. Basic values for which the networks stands are solidarity, cooperation, equal opportunities, intercultural understanding and respect.

On the above date, 14 organisations from BiH, Serbia, Italy, Albania, Romania, Belgium, Germany and.. will sign the establishing paper and present itself to the public, colleges form other organisations and institutions and friends.
